## Necessary Plotting

```
import matplotlib.pyplot as plt
import seaborn as sns
```

### Plot for Fouls committed

```
[35]: Q=df['fouls_committed'].value_counts()
      P=df['club'].value_counts()
```

```
sns.barplot(x=Q.index, y=Q.values)

plt.xlabel('Number of fouls committed')
plt.ylabel('Number of players')
plt.title('Number of Fouls committed per team')
plt.savefig('Number of Fouls committed per team')
plt.show()
```

+ Code + Markdown

### Plot for Position

```
[15]: plt.pie(df['position'].value_counts().values, labels=df['position'].value_counts().index)
      plt.show()
```

### Plot for Teams played

```
fig = plt.figure(figsize = (10, 10))
plt.pie(df['club'].value_counts().values, labels=df['club'].value_counts().index)
plt.show()

#fig = plt.figure(figsize = (10, 5))
#plt.bar(df['fouls_committed'].value_counts().values, df['position'].value_counts().values, width=0.5)
```

## Cross Plot for type of cards

```
[13]: A=df['red'].value_counts()
      B=df['yellow'].value_counts()
```

```
[13]: 0    560
      1     23
      2       1
      Name: yellow, dtype: int64
```

```
[25]: fig, cards=plt.subplots()
      cards.plot(A.index,A.values,color='red')
      cards.plot(B.index,B.values,color='yellow')
      plt.legend(['Red Cards', 'Yellow cards'],loc=0, frameon=True)
      plt.xlabel('Number of Instances per match')
      plt.ylabel('number of players')
```

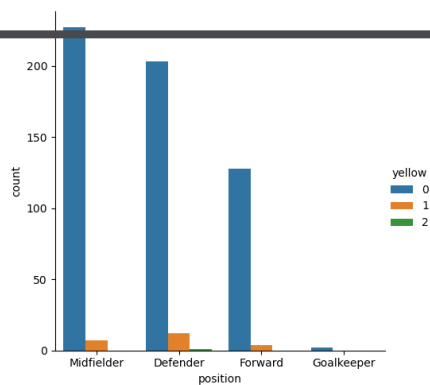

```
[25]: Text(0, 0.5, 'number of players')
```

## Cross Plotting between Position and Yellow Cards

```
[28]: sns.catplot(x="position",hue="yellow",kind="count", data=df)
```

```
[28]: <seaborn.axisgrid.FacetGrid at 0x7fec1eff43d0>
```

## Cross Plot between Position played and number of fouls committed

```
[32]: sns.catplot(x="position",hue="fouls_committed",kind="count", col='yellow', data=df)
```

```
[32]: <seaborn.axisgrid.FacetGrid at 0x7fec2a53b990>
```

matplotlib

## Cross Plot between Position played and number of fouls suffered

```
[33]: sns.catplot(x="position",hue="fouls_suffered",kind="count", col='red', data=df)
```

```
[33]: <seaborn.axisgrid.FacetGrid at 0x7fec29a1f7d0>
```
